

BLC Disinfection Services

Helping You Maintain A Safe Environment For Your Clientele

Safe, Fast, & Effective

 **Safe**

We use a broad spectrum plant-based disinfectant containing Thymol (**antimicrobial component of the herb, thyme**) allowing us to safely disinfect without the use of harsh chemicals or bleach.

 **Fast**

We will work with you to plan the best time to service your facilities. Typical applications take **no more than 1-2 hours**. You can safely return shortly after application, once all surfaces have dried to the touch.

 **Effective**

Cleaning surfaces will help to reduce germs but is not as effective as applying a full spectrum disinfectant. We use hospital grade disinfectant that **kills 99.99% of bacteria and viruses, including Covid19**.

Spaces That Benefit From Being Disinfected

Office Spaces | Restaurants & Bars | Gyms & Sports Facilities | Manufacturing | Apartments & Condos | Long-Term Care Homes | Personal Residences | Cars | & More
